

Appl. No. 10/726,043  
Amdt. Dated February 9, 2007  
Reply to Office Action of November 22, 2006

### **Amendments to Prosecution of the Claims**

This listing of claims will replace all prior versions and listings of claims in the application:

#### **Listing of Claims:**

Claim 1 (canceled)

Claim 2 (previously presented): The locating device as recited in claim 6, wherein the reference points are marked in a regular array.

Claim 3 (previously presented): The locating device as recited in claim 6, wherein the sheet comprises plastic.

Claim 4 (previously presented): The locating device as recited in claim 6, wherein the sheet comprises polyester.

Claim 5 (original): The locating device as recited in claim 4, wherein the sheet comprises polyethylene terephthalate.

Claim 6 (currently amended): A locating device configured for attachment to a surface of a light guide plate that is opposite to another surface thereof, the another surface having dots thereon, the locating device further being configured for measuring distances between the dots of a light guide plate, the locating device comprising a sheet having a plurality of reference points marked thereon, the plurality of reference points being

Amdt. Dated February 9, 2007  
Reply to Office Action of November 22, 2006

configured for locating of the dots during measuring, wherein a distribution density of the reference points is lower than a distribution density of the dots.

Claim 7 (previously presented): The locating device as recited in claim 6, wherein the reference points are colored dots.

Claim 8 (previously presented): The locating device as recited in claim 6, wherein the reference points are marked with numbers.

Claim 9 (canceled)

Claim 10 (previously presented): The method as recited in claim 14, wherein the locating device comprises a sheet having the reference points marked in a regular array.

Claim 11 (original): The method as recited in claim 10, wherein the sheet comprises plastic.

Claim 12 (original): The method as recited in claim 10, wherein the sheet comprises polyester.

Claim 13 (original): The method as recited in claim 12, wherein the sheet comprises polyethylene terephthalate.

Claim 14 (previously presented): A method for using a locating device for measuring distance between dots of a light guide plate, comprising the steps of:

providing the locating device having a plurality of reference points

Appl. No. 10/726,043

Reply to Office Action of November 22, 2006

marked thereon, the plurality of reference points being configured for locating of the dots, a distribution density of the reference points being lower than a distribution density of the dots;

attaching the locating device to a surface of the light guide plate that is opposite to the dots; and

gauging distance between the dots using a measuring instrument.

Claim 15 (previously presented): The method as recited in claim 14, wherein the reference points are colored dots.

Claim 16 (previously presented): The method as recited in claim 14, wherein the reference points are marked with numbers.

Claim 17 (previously presented): The method as recited in claim 14, wherein the measuring instrument is a microscope.

Claims 18-19 (canceled)
